

# Can you find...?

An oak tree still with last year's leaves?

A pile of pine cone scales and cones on the forest floor?

A tree with moss and lichen on the trunk or branches?

A pine cone and one that has had its scales stripped?

Who do you think did that, and why?

This type of lichen on a tree trunk or branch?

a rock covered with moss and lichen?

A sawed-off tree trunk where you can count the rings? How many can you count?

Many young white pine trees?

A plant like this called a clubmoss?
