

## 2021 Suggested Plant Kits

### Based on Soil Conditions and Sunlight Requirements

Below you will find suggested planting kits based on soil conditions and sun requirements. Please note that many plants will be successful outside of these preferences, however they will be more likely to thrive when closely matched with the listed soil and sun conditions.

The below kits are merely suggestions to help guide you as you plan a robust pollinator garden.

When ordering online, you can choose any quantity of each species to best suit the needs of your site. Groupings of plants of the same species is helpful for pollination as it encourages at-risk pollinators to visit multiple plants of the same species consecutively.

#### Wetter Sites
